## Synonyms and Antonyms

**Synonyms** are words that have the same or almost the same meaning.  
Some dinosaurs were **colossal**. Some dinosaurs were **enormous**.

**Antonyms** are words that have opposite meaning.  
Some dinosaurs were very **large**. Some dinosaurs were very **small**.

Dinosaurs are the most exciting and amazing creatures to have ever walked the earth. When they were first discovered, scientists thought that dinosaurs were slow moving, cold blooded lizards that lived in hot, humid swamps.

However, new discoveries prove that dinosaurs were built more like birds. Some dinosaurs were fast moving, warm blooded animals that lived on every continent on Earth, including Antarctica. By comparing the skeletons of modern birds to dinosaur fossils, paleontologists recognized that there are many similarities between the two.

### Match the synonyms.

- |                   |              |
